

Construction Studies - Student Briefs

The following statements represent student's aspirations for their coursework. These have been formulated after some initial research by them. Develop a set of instructions for the student that will ensure a comprehensive range of relevant information for inclusion in the folio is provided.

Construction

I would like to determine a foundation system that is suitable for the soil type in my locality and also meets the passive house standard.

Furniture

Design and make a contemporary coffee table that will complement the existing décor in my parents living room.

Heritage

My grandparents' house is more than 100 years old. I propose to investigate this build in the context of vernacular architecture.

New Technologies

Solar panels offer a sustainable method of providing hot water for my parents' house. The roof surfaces of our rectangular shaped bungalow are orientated east – west. I plan to determine the most effective and visually attractive method of incorporating them in the structure of the building
